

GenTwo is expanding its research and technological development capabilities in Pristina, Kosovo

Zurich, 18 November 2022 – **GenTwo has announced its expansion of the research and technological development capabilities by onboarding a team of talented engineers based in Pristina, Kosovo. The opening of GenTwo X LLC. marks an important step to securing long-term technological development of its own service platform, whilst ensuring customer focused solutions.**

A key component of the growth oriented Swiss fintech service provider builds the data driven service platform, where client centric automation and digitization build the backbone to sustainable growth. By forming this new service organization, GenTwo is furthermore committing to its international strategy by proactively expanding technological resources to new regions whilst ensuring corporate and cultural integration.

Philippe A. Naegeli, CEO and Co-Founder of GenTwo explains: "This add-on to the GenTwo family allows us more flexibility over expanding our business roadmap and technical competencies by sourcing in an environment of high talent density." Pren Pervorfi, COO GenTwo, furthermore highlights that "... the collaboration with the local authorities for setting the foundation of our new company in Pristina has been extremely professional, fully digitized and online, reflecting the local technical savviness and orientation."

The local team of currently 10, led by Managing Director Kristjan Gojani, will combine capabilities in the areas of software development, design and operations and act as integral part of the existing team in Zurich.

About GenTwo, GenTwo Digital and GenTwo X LLC.

GenTwo

Zurich-based innovative securitization specialist GenTwo has invented a new generation of financial products. The company creates securitization platforms for asset managers, banks, family offices and venture capital investors, enabling professional investors to easily invest in bankable and previously non-bankable assets. The focus on off-balance sheet investment products solves the problem of declining margins and growth barriers for many financial market participants. New performance potential emerges through granting access to a theoretically unlimited world of asset classes. Institutional investors can use GenTwo's securitization solution to realize their own product and business innovations, to make any type of assets investable and to help shape new, sustainable markets. Private investors in Switzerland can now also benefit from these innovative products via their financial intermediaries, thereby giving GenTwo the opportunity to open and expand its customer base to retail investors.

GenTwo Digital

GenTwo Digital is based in Crypto Valley in Zug, Switzerland. The subsidiary of GenTwo enables professional investors around the world, and now also private investors in Switzerland, to securitize all digital assets, including crypto assets, in securities on the traditional financial market via their financial intermediaries.

GenTwo X LLC.

GenTwo X LLC. is based in Pristina, Kosovo. The GenTwo owned service provider acts as integral part with focus on operational service delivery, research, and technological development.
